The Best Bra for Small Breasts

Give thanks for your individual beauty, shape and curves. Smaller busts can still get the attention they deserve with stylish fashions and bras that make you feel womanly, fully supported and sexy without the extra baggage. Discover the best bra brands that will give your smaller breasts adoration without feeling as though you have to add extra in order to feel beautiful

Busting Myths

Every woman, no matter her size, deserves a gorgeous and great-fitting bra. Unfortunately, small-busted women have unique challenges. Treacle Tart, lingerie expert and founder of Independent Lingerie Professionals, tells any small-busted woman looking for a great bra shouldn't feel obligated to wear a push-up. "It's often more comfortable to wear styles that enhance and flatter what you have rather than fake what you don't," says Tart. Her two favorite brands for small busts include The Little Bra Company and Lula Lu Petites for perfect fit and sexy style. Other brands created specifically for smaller busts include Affinita's Intimates and Eve's Apples. When searching for your perfect fit for your petite bosoms, look for delicate straps and soft and even lacy materials that flatter your figure.

The Itty Bity Bra

Don't get offended by the name. In fact, celebrate the bra brand company Itty Bity Bra created exclusively for the bust-less fashionista that boasts, "nice things do come in small packages." The collection of sexy and sweet lingerie is sized anywhere from a 32 AA to a 38B without heavy padding, but with great coverage and lift for comfort, support and style.

Barely There

A perfect fitting bra no matter your bust size shouldn't make its presence known. If you're fussing and fighting with your bra, look for one that you hardly know you're wearing. "Good Housekeeping Magazine" selected the Barely There Invisible Look Underwire bra as one of the best bras for A and B cup ladies. Noted as a favorite T-shirt bra, the women who tested loved that the bra had a comfortable fit, held up well after washing and looked smooth under a knit top.

Lailides

Get your hands on Lailides, another bra company that creates notable styles and selections for the smaller busted woman. Online magazine Jezebel recommends Lailides bras sold online for smaller women who don't mind their size and would prefer not to stuff their bras or over-pad them for false advertisement. You can still be sexy in this lace lingerie line that offers style, comfort and flattering design.
