SHOPPING: BERRY BALL

As a person who dreads throwing her delicates into the wash, at the fear of pulling them out as a uniform tangled mess, the **Berry Ball** might just be the solution to the problem. The ball consists of two half shells hinged with a rubber closure to support your bra, while the unique vent holes, allow water to flow thoroughly during the wash and rinse cycles. The floating-ball designed with protruding soft peaks massages the bra using friction for best cleaning results.

The ball comes with a laundry bag specifically designed for panties, socks and hosiery, which would make washing delicates a breeze. I haven't ordered one yet, but if you tried this, and it works, please leave a comment and share your experience with **Berry Ball**. So far, this sounds like a great idea!
