What's under that dress

One person likes this. Be the first of your friends.

One of the most important items you can wear is a bra. Bras seem to be an underestimated clothing item that needs your full attention. Jene Luciani wrote an entire book on the subject "[The Bra Book](#)". The right fit with shape you perfectly for your clothing and a sexy matching set will definitely make you walk with a bit more confidence.

There are no excuses for finding the perfect o style to go with the top or dress you are wearing. Completely strapless styles by [Brazz](#) will work magic in a back baring low front evening gown, and the plus side they provide amazing support too.

[Strapkeeper](#)'s are also a must have item, they are a little bow shaped nude piece that sticks to hold bra straps in place. One of my biggest peeves is clear bra straps they look more obvious than an actual white bra strap showing. Look for styles by Victoria's Secret who provides all shapes, padding and fits. Your tata's will thank you and your friends will compliment how fabulous you look, with just a tiny tweak.

Remember to care for you delicate items too. Pulling a \$50 bra twisted and tangled out of the wash is never a way to treat your pride possessions. [Berry Perry](#) is the ideal solution to care for your lingerie. Quick and easy place your Bra and Panties in the Berry Ball, place it in the washing machine, complete the cycle and hang to air dry. Caring for yourself and the delicate items you put on is essential. How you look under your clothes will result in how you feel outside of your clothes.
